1. Introduction

Pakistan is the country most vulnerable to climate change. It is exposed to a number of server climate induced threats, including natural disasters. It is a cause to wide ranging effects on the people in Pakistan. Climate change brings considerable increase in the frequency and intensity of extreme weather events. in addition, floods and droughts conditions in the country impact productive resources of livelihoods of different walks of life. Children are particularly threatened by climate induced risks. As recurring droughts and floods worsen and the food production affected, consequently children have to bear the great burden of hunger and malnutrition.

In future climate change scenario, Pakistan is expected to experience increase in variability of river flows due to increased variability of precipitation and the melting

of glaciers. Pakistan is signatory to the Paris Agreement that aims to undertake ambitious efforts to combat climate change and adapt to its effects.

To support the Government of Pakistan and Government of Punjab efforts of resilient development, national organizations RASTI and Research and Development (RDF) in partnership with a German International Child Focused Development Organization Kindernothilfe-KNH, organized this day long conference that aimed to discuss climate risks to the lives of children and youth in Pakistan and find out an agreed upon way forward for the future. Held at the provincial capital city Lahore, the conference provided an opportunity to children and youth discuss their experiences and thoughts on climate change with the policy makers and experts.

Conference objectives

- Discuss how children and youth in Pakistan perceive climate and its impact on their future.
- Strengthening the intra-social exchange on climate change from a children's perspectives.
- Advocate for systematically taking the perspective of youths and children on climate change when developing policies and legislation in the field.
- Explore and develop joint possible actions for the future with children, youth and other stakeholders.

Held at a hotel in Lahore, Punjab on 15th October 2020 the conference was able to attract participation of more than 250 people. Almost all key stakeholders like the Minister for Higher Education, Director Environment Department Government of Punjab, school children from various rural areas of Punjab, students of the Punjab University, Colleges, Civil Society Representatives, SHGs and media representatives.

1.2 Children participation in the Conference

More than 80 children's from all over the province not only participated but they led the conference with their thematic speeches, panel discussion, tableaux, performances and question answer session. Keeping in view the four pillars of UN-CRC it was tried best to involve the children in discussion and development of recommendations. Following were the spaces for children in the contents;

- Inauguration of ceremony with a beautiful welcome tableau
- Performance on flood impacts by the children from south Punjab
- Speech on challenges and success regarding climate initiatives
- Participation in panel discussion
- Presentation of conference recommendations

It was a great opportunity that children participated in provincial conference and present their concerns, thoughts and recommendations to the primary and secondary duty bearers.

2. Inauguration of the Conference

Mr. Raja Yasir, Minister for Higher Education and IT inaugurated the conference with cutting of ribbon. Later, after Recitation of the verses from Holy Quran by a young girl, the conference was formally started with the national anthem followed by a wonderful tableau performed by children from Chakwal on the song “don’t cut

me, it pains” to convey their message about importance of trees & preserving the climate by quitting deforestation & promoting reforestation using play cards & different gestures. Children beautifully dressed up like trees & flowers, which gave viewers a real feel.

3. Proceedings of the Conference

Inaugural Session and Speech by the Chief Guests

The proceedings of the conferences proceeded with speeches by key speakers

Key Speakers were:

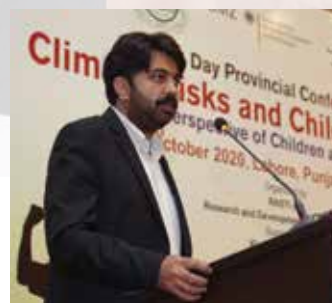

Mr. Sayed Mujahid Hussain
Executive Director RASTI

Mr. Ashfaqe Ahmed Soomro
Executive Director RDF

Ms. Kiran Shehzadi,
Country Coordinator, KNH

Mr. Raja Yasir Hamayoun Sarfraz,
Provincial Minister for Higher Education & IT Punjab

Welcome Note and Conference objectives by Mr. Sayed Mujahid Hussain Executive Director RASTI

Mr. Sayed Mujahid Hussain welcomed all the guests and shared the objectives of the conference on behalf of RASTI and partner organizations KNH, RDF and CUP. While sharing objectives of conference he said that on this occasion different stakeholders are gathered to discuss climate issues from children perspective and the role of youth. Climate change impacts the lives of children in many parts of Punjab, particularly in disaster affected areas. Mujahid further shared that this is a welcoming gesture that children and youth are among us and would discuss today their issues and the suggestions with policy makes and experts and find out way forward how this issue can be tackled in future with the collaboration of all concerned stakeholders. He further said that this conference is although being held first time in Pakistan with a special focus on engaging children and youth, but can be an step towards child centered climate change policies in Pakistan. He thanked to all the participants and hoped that all the stakeholders holders will contribute for this cause

Conference Background and Introduction by Mr. Ashfaqe Ahmed Soomro Executive Director RDF

Mr. Ashfaqe Soomro highlighted the main objectives of the conference along with the background of the series of the conferences being held at provincial and Federal levels. He shared the current situation of climate change in Pakistan and highlighted the prevailing gaps in the implementation of climate action at different levels. Pakistan is amongst the countries most vulnerable to climate change & children and youth are the major victims of it. He urged upon protecting the climate together and prepare children and youth to for climate protection. Mr. Soomro said that youth is not the future but the present of our nation and their intervention is equally important for achieving our development goals. He mentioned that the recommendations of conferences will be put in front of the duty bearers to formulate the effective policies for the climate change which covers the protection and minimization of the risk for the children and youth.

Ms. Kiran Shehzadi, Country Coordinator, KNH

Ms. Kiran Shehzadi expressed gratitude to all the guests and participants for joining in the conference. She shared that KNH is a German child focused organization which is working in Pakistan through 23 projects since late 70', supporting many child & climate related projects in Pakistan. It is rarely discussed that children are the major victims of climate change & initiatives should be taken for this purpose. She shared how KNH realized that climate change may be a serious issue in future and may affect the lives of the public in general and of youth and children in particular. She added that best part of this conference was the participation of the youth and children where their perspectives regarding climate change & its impacts on their lives along with their recommendations for coping with this issue were considered.

Mr. Raja Yasir Hamayoun Sarfraz, Provincial Minister for Higher Education & IT Punjab

Mr. Raja Yasir while addressing to the participants talked of the current Government's priorities and said it is sensitive to climate change. It has launched Billion Tree Project in Pakistan and Clean and Green Campaign to engage youth. He informed of the initiatives of Government of Punjab for environment protection. He shared that our current Government is more concerned on the issue of climate change and for this purpose, our Government has planned the programs like Clean and Green Pakistan and Billion Tsunami Trees Campaign. He openly appreciated the objectives of the conference which focused on risks of the climate change for children and youth. He committed that he will support this cause at all levels particularly in drafting the effective policies at Government level. The Chief Guest, further shared that the most important factor to get the maximum output is to involve the youth and children at different levels to raise awareness about climate change and its impacts on them along with building up their capacities to combat this challenge in future. Minister expressed gratitude to KNH, RASTI, RDF and CUP for organizing the event and to children and youth to participate in it.

Introduction of Friday for Future Movement Germany by Ms. Line

Young climate activist and youth leader from Germany **Ms. Line** joined the conference through ZOOM appli-

cation. She shared the objectives, initiatives and policy advocacy strategies of the German young people's network named "Friday's For Future". She described how the Fridays for Future movement in Germany is mobilizing youth for climate resilience building. She shared that members of this network are mostly the young students who spare themselves every Friday to work for climate/environment protection. She also shared the advocacy tools they are using for positive change. Line also interacted with the young participants of the conference and responded to their questions. It was really a very inspiring story for the youth of Pakistan to get involved with different stakeholders to make effective plans and policies for the tackle this issue particularly to protect the rights of children. Her slogan which was appreciated by participants made very popular "We need actions not hopes". Later, Ms. Sadia was invited to interpret the discussion of Ms. Line to audience in the local language.

Climate Risks
Perspective of Children and Youth
15th October 2020, Lahore, Punjab, Pakistan

A theatre performance on Impacts of Climate Change on lives of people by Children

A group of children from Muzaffargarh presented a wonderful theatre performance highlighting the impacts of natural disasters on the well being of people particularly children. Through their performance, they tried to portray that how different human activities are adversely affecting and deteriorating the climate of Earth which ultimately becomes the cause of natural disasters and harms us in several ways.

3.2 Panel Discussion: Children and Youth Led Climate Actions in Pakistan: Challenges and Success

Panelists

Miss. Sajeela Faiz,
Youth Activist from
South Punjab

Miss. Sadia Khalid,
SDG's Academy, Punjab
Region

Ms. Huria,
Child Activist from
Alipur-Muzaffargarh

Mr. Haider Ali,
Child Activist

Children and youth actively participated in the panel discussions in which they shared about the challenges and success regarding climate initiatives. A child panelist from RASTI Chakwal highlighted the impacts of climate change on children and the role played by them in the fight against climate change. Youth shared some of the youth initiatives taken by them on climate change. A presentation was also given by SDG's Academy Youths about how young people are managing climate risks. Youth panelists shared their perspective about what actually the climate change risk is and how it can be minimized.

Speech by Miss. Sajeela Faiz, Youth Activist from South Punjab

She talked about the role of youth in mitigating the effects of climate change. She shared that she belong to a backward area of south Punjab which is often flooded. She also shared that her group members are working together to plant trees and highlight their importance. This group participated in many capacity building trainings conducted by the organizations working for environment protection. The objective is to involve NICE Youth in climate friendly activities. Their core message is Plant "One Tree for Mother Land". They have recently signed an MOU with Government Forest Department to plant 5000 trees in the area and in this campaign RASTI and other NGO's will support them as a technical partners. They have planted more than 2000 plants under this campaign till now. The overall benefit of plantation is to decrease carbon dioxide and to provide solid and natural protection to the sides of the river to minimize the flood impacts. The second most important campaign they are leading is to minimize the use of plastic bags.

At last she asked all participants for a promise on their slogan "One Tree for Mother Land" and all promised by raising hands to support their campaign.

Speech by Ms. Sadia Khalid, Young Activist SDGs Academy, Punjab Region

Ms. Sadia, a young climate activist while discussing about the youth led climate actions said that the main aim of Fridays for future movement as described by line, is promoting the youth and children engagement who are realizing the importance of climate action from this early age. Many drastic disasters have been observed in the last 10 years due to which different countries has faced many economic, social and political losses. Pakistan is one of the countries with the highest environmental risks. She also mentioned about UN Youth 2030 strategy which places young people at the center of Development Agenda, is especially relevant in Pakistan where more than two-third of the population is under the age of 30. With a decade remaining achieve the 2030 Sustainable Development Goals. Invest in young people so that they can realize their capabilities to pursue gainful and decent employment, education opportunities, health and wellbeing, as well as civic and political empowerment in particular in view of the climate risk. She also mentioned about different government funding programs initiated for environment conserving purpose. There is need to implement curriculum policy related to climate related subjects. Youth clubs or committees should be established in educational institutes for climate action.

Speech by Child Activist Ms. Huria from Alipur-Muzaffargarh

She said she would discuss climate change and its effects on children

Here focus was to discuss climate change effects globally, Asia and Pakistan in particular she share that global warming was being caused by climate change man-made gases and chemical have turned greenhouse layer into pearls. These problems have led to a number of illnesses, including skin diseases, hemorrhage and mental illness. The glaciers are melting, sea level is rising, the rain patterns are varying , and main food crops are getting affected by various plant diseases. If these resources will keep degrading due to climate change them may be the malnutrition becomes an epidemic in the future. The biological system is being destroyed and we have to save it because it is our battle for survival.

Speech by Child Activist Ali Haider

Mr. Ali Haider that we all are responsible for the climate change. We have entered an era where climate change in Pakistan is even worse than terrorism. Its destruction is increasing year by year and we are not realizing it. Ground water level is declining, air pollution is increasing, droughts are increasing, and rainfall is intensifying as Karachi sank in just a few hours. Consequently the civic activities are disrupted, death rate is increasing and economic condition is getting worse. Now we can't take our eyes off from the constant rise in temperature. If we do not take steps to deal with it now, the destruction may be greater with a huge effect on the well-being of children in future.

3.3 Panel Discussion: Provincial Policies and Programs addressing Child Security Amid Climate Change

Panelists

Mr. Irfan Gondal, Director Programs Social Welfare Department Punjab

Professor Amjad Abbasi HOD Environmental Sciences, University of Punjab

Malik Abdul Majeed Pirhar Range Forest Officer Muzaffargarh

Ms. Iram Social Activist & Provincial Coordinator of an Organization

Representatives from social welfare department, environmental experts and activists, HOD's environment of different universities and colleges, NGO's working for climate joined in as panelists in which they talked about environment conservation addressing Children's needs.

Speakers not only shared the climate risks but also shared the challenges and initiatives taken in individual and holistic capacities. The panelists also discussed an overview and implementation challenges of provincial environment policies and frameworks. Panelists also highlighted the inclusion of children and youth in disaster management paradigm and addressed child security amid climate change.

Speech by Mr. Irfan Gondal, Director Programs Social Welfare Department Punjab

Mr. Irfan Gondal shared the child rights policies and facilities available for children in their department. He also shared the collective efforts of Punjab Government and different UN child focused agencies, INGO's and child related departments for mitigating the impacts of climate change on children. Mr. Irfan Gondal showed his sincere commitment to incorporate climate risks with the current programs on child rights and child protections.

Professor Amjad Abbasi HOD Environmental Sciences, University of Punjab

He shared that I have been teaching students about environmental sciences for fifteen years but never before had I realized that climate change and global warming can be so dangerous for children. For me, the words of a young student present in conference were a source of fear, in which she said I have to complete my graduation but due to drastic climate change, I may not survive. I have served for some time as a child protection officer with the government so I think child protection from dangers of climate change should be part of the policy document.

Malik Abdul Majeed Pirhar
 Range Forest Officer Muzaffargarh

He mentioned the responsibilities of his department and share how they are facing floods and its socio-economic disastrous effects. He also mentioned joint efforts under which six lacs plants would be planted of which forty thousand planted with the help of civil society organization creating awareness on importance of plants for sustainable environment. His department provided some land under an agreement with RASTI to develop a nursery for plants. It is hoped that such initiatives will help government and organizations work together to create an environment that is peaceful for generation to come.

Ms. Iram
 Social Activist & Provincial Coordinator of an Organization

At the beginning of her speech, she said that children are most effected by any disaster such as floods or earthquake. Poverty increases due to disasters and child protection issues arise, such as low age marriages and child labour etc. Referring to the countries of South Asia, she said that weather is almost the same problems caused by them are also same. We need to change our individuals and collective attitudes towards climate so that we can live up to our social responsibilities.

One Day Provincial Conference on Climate Risks and Children's Future: Perspective of Children and Youth

15th October 2020, Lahore, Punjab, Pakistan

Organized by RASTI and Research and Development Foundation (RDF)
Supported by Khyber Pakhtunkhwa (KNH), Government of Punjab, Ministry of Economic Cooperation and Development (M2)

3.4 A Theater Performance On Climate Risks

A theatre performance was beautifully presented by the youth group of Mine Theater. Through their mesmerizing performance, they portrayed the climate risks and its effects on the youth of Pakistan.

Legend Singer Ustad Hamid Ali Khan also participated in the conference and showed his love and commitment

for our future children and young people. He sang a song for children and appreciated the efforts of RDF for organizing this conferences on the climate change issue focusing its effects on children youth. He gave a message that he is with the children and with the future of the country.

4. Conclusion of the Conference

The country is in dire need of mitigation in terms of climate change and its threats. This is possible only when we are fully aware of it and what actions we take, a policy document should guide us. With all these plans a long effort and mutual cooperation of the RASTI and partners KNH, RDF, CUP, we have already brought together all the stakeholders from all over the Punjab

Province. An excellent purposeful day was completed according to a thematic schedule and a meaningful participation of all concern departments and concern stakeholders. The recommendations of this conference will certainly be helpful to initiate discussion for policy document.

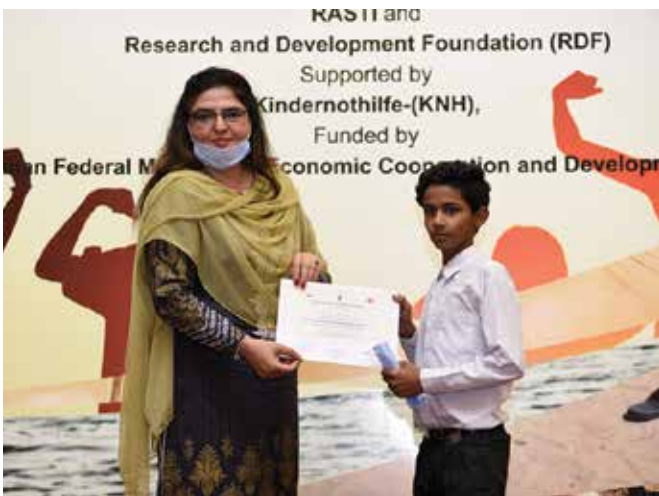

4.1 Distribution of Shields/ Certificates

Presented shields to distinguished guests including minister, government representatives, social workers and environmental experts so that they are encouraged for their exertions. These honorable guests and

the organizer partners also presented certificate of participation to performer children and young peoples, small gifts were also presented to all children and young participants of the conference.

4.2 Recommendations of the Conference

After a daylong discussions, speeches and other activities, the following recommendations were presented by a very young girl Roman Ayesha.

1. Children emphasized that in any disaster the life and dignity of children comes at risk. Disasters affect children badly. Therefore the Government and civil society together should take measures to safeguard the future of children
2. Tree plantation is best and cheaper solution of environment conservation, in which children can take effective role. So children should be involved actively and assisted in all Government run initiatives of tree plantation such as the Billion Tree Project by the Government of Pakistan.
3. Government should make 'Children Led Action for Climate' framework to engage children in all environmental conservation initiatives and climate adaptation measures.
4. In schools maximum trees should be planted, focusing on indigenous species.
5. Every effort should be made to empower children as they could take decisions of their career and grow to be productive resource for the society. For this quality education is the primary need of children in Pakistan.
6. Climate change should be included in textbooks and curriculum as it could be part of the studies.
7. Children should be made part of every effort being taken regionally, nationally and internationally of reducing GHGs.

5. Conference Declaration

A young climate activist Ms. Basal Tariq presented the declaration of the conference.

This conference on Climate Change Risks and Children's Security declares that the children's vulnerability to climate change fundamentally threatens the realization of many of their rights as stated in the UN Convention on the Rights of the Child. It multiplies their vulnerabilities. The conference opines that the children's rights of dignified access to safe water, sanitation, quality education, food, health, socialization, participation and association are affected in any disaster.

The conference organized by Research and Development Foundation (RDF) in collaboration with Kindernohtilfe (KNH) eV Germany, Community Uplift Program and RASTI significantly discussed climate change issues from the children and youth perspective that was first of its kind in Pakistan.

This conference affirms that there is a lack of child centered climate governance structures and programs that safeguard the dignity of children. Children particularly from vulnerable and poor communities are affected at large in any climate induced disaster, thus their future is at stake, mainly because of their immunity.

It is a matter of serious concern that generally children lack knowledge and skills to absorb the shocks and undergo severe psychological distresses.

In many cases, children couldn't continue their education in the wake of any disaster. Disasters severely affect the learning and education of children. Usually in Pakistan schools are used as shelter or camps for flood affected people. The mental and cognitive development retards in many cases. Hence, this conference proposes that the learning of children should not be compromised in any case.

The issue is of the displacement of children due to any disaster. Children's protection issues arise and they become at risk. All who have the responsibility of protecting the future of children should aggressively ensure the protection of children in any climate induced disaster.

It is evident that climate change threatens food resources, security, health and the stock, of that the children become first victim. The physical and psychological development deteriorates in disasters.

This conference proposes to the Government for the formulation of 'Children Commission on Environment and Climate Change' to take care of the rights of children at risk and assure the implementation of child centered environmental governance and policies. Considering the policy implementation gaps, it suggests formulation of child friendly environmental policies and programs that safeguard the participation of children and their aspirations in environmental and climate change adaptation initiatives.

Furthermore, it recommends:

1. to making Syllabus and curriculum environment sensitive and taking care of children's adaption needs. Child-centered awareness programs for the children in climate affected communities and areas. Life skills for the children to strengthen their resilience and capabilities to absorb shocks and respond to the shocks. Recreational activities at the learning places, schools and playgrounds should be ensured.
2. Quality education with all required amenities for the joyful learning of children. Off-grid schools with greener energy have to be developed to protect the environment and improve study conditions for children.
3. Effective and efficient DRR mechanisms and relief programs that support the children at risk
4. Efficient traffic management to avoid children accidents on roads
5. Urban solid waste management that could improve children's wellbeing and avoid children's engagement and activities to collect garbage and avoid them as scavengers
6. Recycling of solid waste management for greener future of the children

The conference partners and the participants declare to step up all possible measures and their will and the commitment to protect rights of the children amid Climate Change for the prosperous future of Pakistan.
